SUMMARY

Full-Stack Web Developer with hands-on experience building real-world applications using React.js, TypeScript, Node.js, Express.js, MongoDB, and Tailwind CSS. Experienced in REST API development, authentication, role-based workflows, database integration, appointment scheduling, and responsive frontend development.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript
Frontend: React.js, Next.js, HTML, CSS, Tailwind CSS, React Router, Vite
Backend: Node.js, Express.js, REST APIs
Database: MongoDB, Mongoose
Authentication: JWT, Cookies, bcrypt
Tools: Git, GitHub, Postman, Axios, CORS, Cookie Parser

PROJECTS

Surhires – Recruitment Platform Website Live | GitHub
Next.js, TypeScript, Tailwind CSS

- Built a responsive 3-page recruitment platform (Home, Jobs, Employers) using Next.js (App Router), TypeScript, and Tailwind CSS, deployed live on Vercel.
- Implemented live job filtering by role, company, location, and job type, and a validated "Post a job" form with success state.
- Achieved Lighthouse mobile scores of 96 (Performance) and 100 in Accessibility, Best Practices, and SEO.
- Built accessible UI with a keyboard-usable FAQ accordion, ARIA-enabled mobile menu, and reduced-motion support.

Notes Keeper AI Live | GitHub
React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Vite

- Built a full-stack AI-powered notes application with a React.js frontend and a Node.js/Express.js backend.
- Implemented note creation, editing, and deletion with persistent data storage in MongoDB.
- Integrated AI into the note-taking workflow, connecting the React.js frontend to AI-powered Node.js/Express.js API endpoints.
- Added AI-assisted features that let users get intelligent help directly within their notes, improving productivity.
- Set up a GitHub Actions workflow and deployed the application live on Vercel.

Inventory Management System Live | GitHub
React.js, Node.js, Express.js, MongoDB, JWT, Tailwind CSS, Vite

- Built a full-stack inventory management system with product management to add, update, and delete products and track stock levels.
- Implemented low-stock and out-of-stock detection with inventory calculations on a dashboard.
- Implemented JWT authentication with secure cookies, bcrypt password hashing, and protected routes.
- Built a responsive interface using React.js, Vite, Tailwind CSS, and Axios, deployed live on Vercel.

Syncora – Appointment Booking System
React.js, Node.js, Express.js, MongoDB, JWT, Tailwind CSS

- Built a full-stack appointment booking platform connecting clients with Doctors, Lawyers, Barbers, and Trainers.
- Developed availability management for professionals to add dates and multiple time slots.
- Implemented appointment lifecycle with Pending, Confirmed, and Cancelled statuses.
- Implemented JWT authentication with access/refresh tokens and role-based access for clients and professionals.

Chat Application
React.js, JavaScript, Node.js, Express.js, MongoDB

- Built a chat application with a React.js frontend and Node.js/Express.js backend.
- Integrated MongoDB for persistent user and application data and connected frontend services through APIs.

EDUCATION

Government Engineering College, Ajmer Ajmer, Rajasthan
Bachelor of Technology – Computer Science Sep 2025 – Jun 2029
Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks
Class 12th: JAC (Jharkhand Academic Council)
Class 10th: CBSE (Central Board of Secondary Education)
